

Press Release

Berlin, January 8, 2020

Kithara at the Embedded World 2020

Kithara Software will be attending this year's Embedded World in Nuremberg from February 25 to 27 as exhibitor at booth 446 in hall 4. At the trade show with focus on embedded systems for industrial applications, which is also one of the main development sectors for Kithara, the Berlin company will present the latest software-based real-time innovations

At the Embedded World, leading international fair for all topics surrounding embedded technologies, Kithara will showcase its most recent developments for real-time software solutions. Special emphasis will be on the functions of Kithara RealTime Suite regarding automation with EtherCAT, real-time image capturing and processing, connection to automotive interfaces as well as real-time data storage. At the Kithara booth, visitors are provided with visual showcases of the real-time system, first-hand in-depth information as well as personal consultation for individual solutions.

“The Embedded World is a great platform for Kithara to present one of the most important application fields of our software. Due to the fact that embedded systems oftentimes have even ‘hard’ real-time requirements, it does not come as a surprise that Kithara RealTime Suite is used frequently

in this field. This is why we are looking especially forward to giving visitors an understanding of the benefits of our real-time system and thus finding the perfect software solution for their embedded projects”, Uwe Jesgarz, managing director of Kithara Software, explained.

With more than 1,100 exhibitors, the Embedded World presents the state of the art for all aspects concerning embedded technologies, ranging from components, modules and all-in-one systems to hardware and software tools as well as services for embedded systems.

Kithara Software GmbH

Kithara Software is a specialist for real-time solutions, especially for the Windows operating systems family. The real-time extension Kithara RealTime Suite is a comprehensive system library for hardware-dependent programming, communication, automation and machine vision. The software is an easy-to-use and powerful technical basis for advanced applications in production and manufacturing, automotive electronics as well as measurement and control engineering. It is the key element in machine building, testing rig development and other specialized applications. Kithara Software has representations in the USA as well as Asia and supports global companies with their innovative projects.
